**KEYPAD PROGRAMMING**

**Delete All Codes (Recommended for initial set up):**
Press and hold C button until a series of confirmation beeps (continuous beeping). You will have to hold the C button for about 10-35 seconds.

**Add a Code**
Press the “S” button once
Enter a 2 to 8 digit passcode followed by the unlock button
Within 5 sec.

**Delete a Code**
Press the “C” button once
Enter the code you wish to delete followed by the unlock button
Within 5 sec.

**TROUBLESHOOTING**

**Low Batteries (Most Common Issue):**
If the lock produces a longer set of rapid beeps and either locks or does not lock the door, you have low batteries. To avoid any difficulties during set up, make sure you are using brand new alkaline batteries. Using a battery tester is not recommended.

**Loose Keypad Connection:**
If the lock beeps 2 times then locks, enter the passcode and confirm every button beeps when pressed.
If some of the numbers are not beeping, replace the keypad module (Part B) and inspect the wires for any pinches or tears. Make sure to check the wires coming from the keypad as well. Disconnect the wires and make sure the pins on the keypad connection are not bent out of alignment. Reconnect the wires and confirm every button on the keypad is beeping when pressed.

If you are still having keypad issues after following our troubleshooting guide, call us for a replacement under warranty.

**Function Test:**
If a passcode has not been successfully programmed, the lock will not operate using the keypad. (See chart if a passcode has been successfully programmed in the memory):
1. Unlock the locks and open the door. Make sure you keep the door open while troubleshooting.
2. Press the LOCK button on the keypad 1 time and listen to the beeps:
   - If the lock beeps 2 times and does lock, it does not have a passcode set in its memory. Refer to the programming page for information on adding a passcode.
   - If the lock produces a longer set of rapid beeps and either locks or does not lock the door, you have low batteries.
   - Replace the batteries with a set of 4 premium “AA” alkaline batteries.
   - If the lock beeps 2 times then locks, it has at least 1 passcode stored in its memory and is operating correctly.

**WARRANTY**

MiProducts Corporation warrants to the original residential user of this product that it will be free from defects in materials and workmanship, under normal use, for 1 year from the date of purchase. This warranty does not cover abuse or misuse of products or products used in commercial applications. All mechanical components carry a limited warranty, for a period of 25 years from the date of purchase. The finish of the exterior of the lock carries a limited warranty of lifetime of the unit against deterioration due to normal weather conditions. This warranty does not apply to locks that have been improperly installed, modified, part of a set other than designed, or subjected to acts of God (such as floods, lightning, earthquakes, etc.).

If this warranty is limited to repairing or replacing of this lock only as manufactured by MiProducts Corporation’s sole discretion. MiProducts Corporation will NOT be liable for the cost of installing, removing, or reinstalling this product, nor direct, indirect, or consequential damages to persons or property resulting from the use of this product. This warranty only covers the cost of replacement parts, it does not cover shipping & handling fees.

To implement this warranty please give us a call during business hours at 1-800-355-0157 or visit www.milocks.com.

**GENERAL WARNINGS & CAUTIONS:**

**Tools Required (not included):**
1. Phillips Screwdriver
2. AA Batteries

**Auto-Lock Function:**
On the back module (Part D), there is a switch labeled “On-Off” which controls the auto-lock function.
- On = Automatic lock after 10 seconds. (shorter battery life up to 50%)
- Off = Does not automatically lock.

**Battery Precautions:**
- Do not mix old and new batteries.
- Do not use rechargeable batteries.
- Remove batteries from product when storing for extended periods of time.
- Do not dispose of batteries or for any other reason than those directed by the local battery disposal procedure.
- Do not disassemble batteries. Batteries become hazardous if the internal components are exposed to the environment. If exposed, the electrolyte can leak and can cause serious harm to the eyes or skin. If swallowed, the electrolyte can be toxic.

- Make sure that alkaline batteries are not used with rechargeable batteries. Using a battery tester is not recommended.
- Avoid mixing alkaline and rechargeable batteries. Electrolyte can leak from the batteries is corrosive and can cause serious harm to the eyes or skin. If swallowed, the electrolyte can be toxic.

- For assistance with assembly or installation, parts and customer service, call: 1-800-355-0157 (English & Spanish) 9am – 5pm PST Mon. – Fri. North America

**Warranty Claim:**
If you have a question or issue with your product, you should submit a warranty claim during the use of our product, you should submit a product registration to validate the warranty. The warranty is not voided with us so you cannot refuse to accept the product or request a refund of the product. Call us at 1-800-355-0157 or visit www.milocks.com

**Register Your Product:**
Please register your product. Your registration helps us to keep you informed about future developments and important information. It also allows you to take advantage of our special offers, promotions and events.
